

HYCON BREAKERS

POWER BEYOND COMPARE

The reliability, the sturdy design and the supreme component quality of the HYCON HH-series means long life - also under extreme working and weather conditions.

HYCON PICK HAMMERS AND BREAKERS

The HYCON hydraulic breaker is sturdy and compact. It hits harder than any other type of breaker due to the core characteristics of hydraulics.

For instance, a HYCON 15 kg breaker has much higher performance than a 15 kg electric breaker. The breaker has only few moving parts, which means minimal wear and very few parts to replace.

HH10RV

HYCON HH10RV is an exceptionally handy lightweight pick hammer designed for horizontal breaking in walls, brick wall and reinforced concrete.

The low weight and compact design makes it very suitable for narrow working places.

HH15

HYCON HH15 is the ideal choice for professionals working in the light construction industry.

Even with only 19,2 kilos, the performance equals a 25-30 kg electric breaker. It works inside or outside regardless of weather, dust and even under water.

HH20

HYCON HH20 is a compact all-round breaker. Despite low weight it handles even the toughest jobs.

It is designed for breaking concrete, asphalt, frozen ground, etc. It comes standard with a vibration-reduced handle, which brings high operator comfort.

HH20RV

HYCON HH20RV is a compact all-round 24 kg breaker. Despite low weight, it handles even the toughest jobs.

It is designed for breaking concrete, asphalt, frozen ground, brick wall etc.

Safety trigger

Steel casted handles with vulcanized rubber handles in ergonomic design

HYCON anti vibration handle comes as standard on all T-handles
- protects the operator from getting white fingers etc.

Hydraulic oil provides continous lubrication of internal parts for longer service life

Strong handle in one piece that cannot break
- only two changeable springs

Long through hardened piston smooth surface threatment for long seal life

Accumulator can be serviced from the outside

Modular, re-buildable design platform improves serviceability

Double piston sealing

Accepts all standard HEX shanks

ADDITIONAL FEATURES:

- ▶ D- or T-handle dependent on the chosen model.
- ▶ Quieter operation than pneumatic tools - allows for use in sensitive areas.
- ▶ Higher impact than comparable sizes alternative platforms.
- ▶ A wide range of breakers - fits every need.
- ▶ Gas-nitride piston for rust protection and long seal life.
- ▶ Easy access accumulator with short flow distance to work area.
- ▶ Operates both vertical and horizontal depending on the chosen model.

HH23

HYCON HH23 is a compact and sturdy breaker with 40% higher performance than HH20. It is designed for tough jobs in strong concrete, asphalt, ramming, etc.

Comes standard with the HYCON vibration-reduced handle.

HH25

HYCON HH25 is compact and has very high performance in relation to its weight. It is designed for tough jobs of breaking strong concrete, asphalt, frozen ground etc.

HH25 comes standard with the HYCON vibration-reduced handle. It is available both as 20 and 30 l.p.m.models.

HH27

HYCON HH27 is exceptionally strong coping with all jobs requiring extreme power (75% higher performance than HH20). Best power to weight ratio. It is designed for breaking hard concrete, asphalt, ramming jobs etc.

HH27 comes standard with the HYCON vibration-reduced handle.

HH35

HYCON HH35 is exceptionally strong coping with all jobs requiring extreme power. The breaker has an extra accumulator, which adds even more power, and it hits more than twice as hard as the HH20 and outperform any other 45 kg breaker in the market - no matter if pneumatic or hydraulic.
