

Value in depth...

- the HYCON HRS Ring Saw..!

With a cutting depth of 300 mm this unique tool gives you the best cutting-economy, higher efficiency and a lot more power!

The HYCON hydraulic ring saw offers you the most overall efficient and productive 300 mm deep cutting. Imagine all the new work it will open up to your business and for you to carry out at minimum cost. All parts run in oil - no down time and service is next to nothing.

The HYCON ring saw has a unique design and state of the art drive mechanism that will give you many hours of use and long lasting wearing parts that will ensure you low operating cost.

Investing in a ring saw is investing in more work because it will cut 300 mm deep compared to common petrol or hydraulic circular hand saws that only cut up to 162 mm. It is also investing in higher efficiency because it will cut 300 mm deep resulting in less work afterwards (e.g. a doorway) and less after work means job done faster and much cheaper!

- *Cut any concrete, bricks, stone, etc. also with rebar in 300 mm depth*
- *Cutting of openings for doors and windows, cutting of pipes, etc.*
- *Under water jobs*
- *Very powerful - up to 18 HP*
- *ASCO Safety System*
- *Long lifetime - all parts run in oil*
- *Ergonomic design - operator comfort*
- *Easy change of discs*
- *Lower vibrations and weight*

Take a measure:
The HYCON HRS ring saw cuts any concrete, bricks, stone, etc - also with rebar in 300 mm depth..!

HYCON HRS Ring Saw

Technical Data

Weight w/o disc, kg	10.9
Diamond disc, mm	400
Cutting depth, mm	300
Oil flow, l.p.m	30-40
Working pressure, max bar	160
Vibration level (3 axis) m/s ²	2.5
Noise level 1 m L _{pa} dB	109
Cutting speed, m/s	37-49
Rotation r.p.m.	1750-2350

Additional HYCON Tools

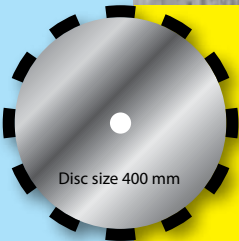

HYCON powerpacks are the ideal partner for your ring saw. Both our HPP13 FLEX and HPP18V FLEX have lots of power and second to none durability. With our ring cooler design we ensure outstanding lifetime and a cooling that will guaranteed never run warm. All our electric packs have integrated oil cooler - they do NOT need water for cooling and will work in all weather condition, even hard frost where you cannot have water for cooling. Visit www.hycon.dk for information on all our professional products.
